

Lecture 22: CSS Shadow Effects - Box Shadow & Text Shadow

Shadows in CSS (by default shadow color is black) → Custom Variables

What is shadow?

ye basically isky use krky hain hum apny box mai box

There are two types of shadow in CSS: Box Shadow & Text Shadow

Custom Variables

age let's say

Examples: 2px 10px 5px black

radius ↓ 10px
y-axis ↓ 5px
color ↓ black

② 2px 10px 5px 10px
radius ↓ 10px
y-axis ↓ 5px
color ↓ blue
spread ↓ 10px

(kithi dou bk spread karna chahy hain)

③ we can also

add multiple shadows by separating with comma

NOTE

ky bides mai jitnay pixel ki value zar krty jaty hain utani blur kam hota jata hai

NOTE: agr mai custom

variables ko kisi box ya container mai create krog; tu mai whi use

krskrogi, lekin age mai inky root { create krog; tu }

meny i color red ko use krkna hai and then usko change krkna chahy koi ab puri code mai pata nhi kaha kaha red color hoga, isly mai osbox mai --primary-color: red use krkrogi and then mai simply ismai color change krog; tu wo puri code mai hojega

can access anywhere
